

DATASHEET

Alchemy Web 4.1

Automatically Publish Content as a Web site, Browse, Search or View Content From One or Many Repositories

FEATURES AT A GLANCE

- For content consumers using the Internet or intranets
- Publishes Alchemy repositories to the Internet
- Browser-based search and retrieval program
- Highly secure document viewing for PDFs, TIFs, other images and COLD
- Global search across many repositories

When you have fixed content that must be accessed by remote users over the Internet, add Captaris Alchemy Web to your Alchemy Server system. An Alchemy Web license adds two main components to your system.

NEW IN ALCHEMY WEB 4.1

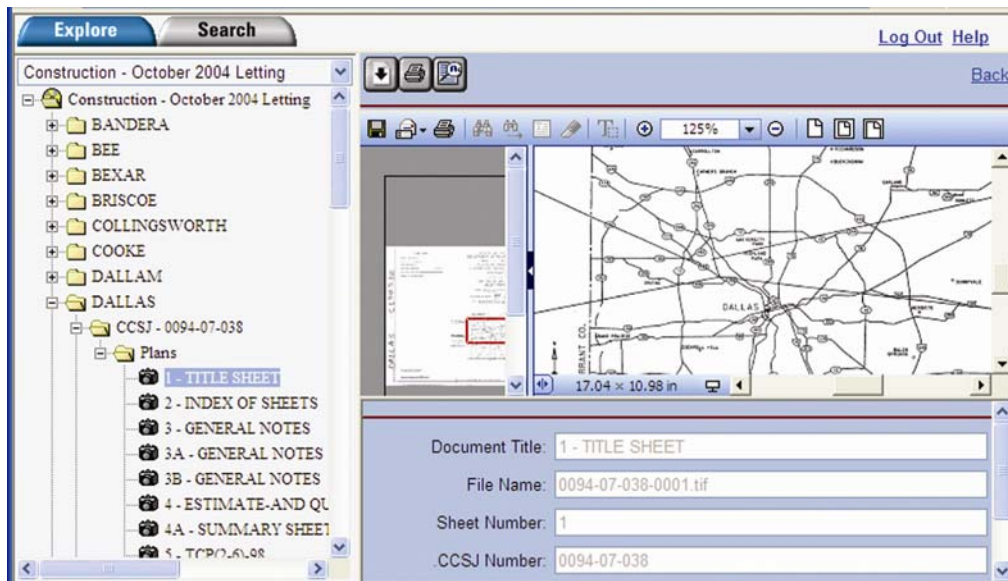

- Compatible with the Alchemy 8.0 Advanced Server
- View document versions (through Advanced Server Library Services)

ALCHEMY WEB ENGINE

Web Engine is the server-side .NET component that manages HTTP access, decides what repositories to publish and determines the settings for end-users. It includes a management console to add or remove repositories. The Web administrator can configure several options for users such as document viewing options, search result list settings and background colors and fonts.

ALCHEMY WEB SEARCH

Web Search is the content consumer interface that runs within Internet Explorer and is automatically published when a user logs in to an Alchemy Web site. It has the same look and feel as the popular Alchemy Search for Windows client, bringing the convenience and power of the classic '3-pane' contextual view developed by Captaris to the Internet.

Plans Online Web site views are courtesy of the Texas Department of Transportation

Key features include:

- Classic 3-pane contextual view of a repository
- Special combo viewer for PDFs, TIFs, color images and COLD
- Combined full-text and metadata queries
- Search across many repositories with one query
- Add files option: upload files to the repository and add index information
- Optional server-based file converter to HTML and GIF
- Send multiple documents as attachments in one email
- Convert TIF or text files to PDF (with the Captaris Viewer)

POWERFUL YET SIMPLE QUERIES ACROSS REPOSITORIES

One simple query races across multiple repositories to quickly produce a results list, neatly categorized by repository. Sort the results by title, date or a custom profile field. Then simply click and view the contents.

Search In (ctrl+click to select multiple):
All Databases
Aviation Construction - August 2004 Lettings
Aviation Construction - July 2004 Lettings
Aviation Construction - June 2004 Lettings

NEW AND UNIQUE FIXED-CONTENT VIEWER

Captaris has developed a very efficient, highly secure and easy to use viewer for the Internet. This viewer provides fast and consistent display of PDF files, TIFs, color image files (JPEG, BMP, GIF etc.), text files and COLD text with overlays—all in one viewer.

It has several special features such as the option to save or email the viewed document as a PDF, TIF or HTML version. The viewer also has a full-screen, slide show option for applications where you need to browse a large image collection quickly.

INTEGRATION WITH OTHER WEB APPLICATIONS

Access repositories and content from within other Web applications.

- You can execute simple or complex searches from within another Web application and pass them to the Alchemy Web server. The search results will be displayed within the Alchemy Web browser.
- You can place links on any Web page to any document in a repository. When a user clicks on the link, the document will be downloaded, or displayed within the Alchemy Viewer, or opened in a desktop application.
- You can place links to repositories on any Web page. When a user clicks on the link, the repository is opened in the Alchemy Web browser.

POPULAR APPLICATIONS FOR ALCHEMY WEB

- Public records access for government entities
- Customer service archives
- Construction projects
- Offsite hosting at service bureaus
- Due diligence projects
- Email archive access

SYSTEM REQUIREMENTS

Server

- Alchemy Standard or Advanced Server 8.0
- Windows Server 2000 or 2003
- IIS 5.0 and above
- .NET Framework 1.1
- MSMQ

Browser Client

- Internet Explorer Version 5.5 or higher
