

DATASHEET

Captaris Workflow Wizard for Microsoft CMS

Captaris Workflow, powered by Teamplate, combines with Microsoft Content Management Server (CMS) to extend Web publishing solutions by automating simple or complex content related collaboration and approval workflows (multi-approval, multi-author, inter-enterprise). The Captaris Workflow Wizard for CMS empowers information workers to build and deploy CMS embedded workflows with "no-scripting" required from within the context of CMS.

"Captaris Workflow [formerly known as Teamplate] has extensive experience integrating with Microsoft products, and the Workflow Wizard is yet another offering that has seamless integration, allowing customers to install and run the two products together with ease. Content Management Server customers looking for enhanced workflow have an excellent option with the Workflow Wizard." —Microsoft Corporation

QUICK FACTS

Out-of-the-box Functionality - for organizations where workflow is required to manage content, the Captaris Workflow Wizard for CMS provides a "no-scripting-required" solution. Captaris Workflow Wizard for CMS installs within the context of Microsoft CMS 2002 providing a seamless interface to CMS users. Captaris Workflow Wizard for CMS is provided with sample forms and a tutorial for an accelerated deployment.

Robust Feature Set - Captaris Workflow Wizard for CMS allows multi-approvals, parallel approvals, re-works and sophisticated workflow features. Content management workflows can be easily tailored to accommodate the organization's business rules.

Empowers Knowledge Workers - allows anywhere, anytime, any device access and the selection of "best-practice"

workflows. Captaris Workflow Wizard for CMS comes with built-in task and business activity monitoring and a "step-by-step" information worker wizard interface.

Delivers Business Value - delivers a measurable Return on Investment (ROI) and a lower Total Cost of Ownership (TCO) compared to other content management solutions.

FEATURES AND INTEGRATION

- Serial, parallel and conditional workflow
- Task lists created for individual users
- Capability of assigning a single page to a single user, not just a member of the channel
- Workflows assigned to CMS channels and sub-channels
- Migration to full Captaris Workflow Integrated Design Environment (IDE)

KEY DIFFERENTIATORS

- **Pure Microsoft .NET Technology** - developed using Visual Studio .NET, C# and XML Web Services.
- **Ease-of-use** - Captaris Workflow Wizard for CMS combines robust functionality with ease-of-use for information workers, designers, managers and system administrators.
